The trouble grows out of the employment of "scab" painters by the contraction who are doing the work, and is alleged by the workmen as a strong argu-ment against the system of letting the work by contract, only to be sublet to smaller contractors.

The aren this morning say that the Strauch factory will be forced to close within the next force eight hours.

Unless these "scab" painters are discharged and union men only employed, at the union wages of \$3,50 a day, a general strike will be ordered of all the building trades employed on the school buildings where "scab" painters are employed, and there is every

prospect that the men will all be ordered out by Wednesday.

This morning the strike was begun, when fifteen Union painters were ordered out at Grammar School No. 28, on West Fortieth siree, because Contractor Ford offered to pay as a day's wages but \$2.25.
Eight men were also ordered out at the new school at One Hundred and Fifty-sixth street and St. Nicholas avenue, where Ford also has the painting

Mexico Warns Guatemala.

Costa Rica and Nicaragua,

[SPECIAL TO THE EVENING WORLD.] CITY OF MEXICO. July 21. - Despatches from San Salvador indicate that the war which the Guatemalans began informally. though not unexpectedly, on Thursday last by an invasion of San Salvador, is being pushed vigorously home to Guate-

Not only were the invaders defeated with heavy loss in that engagement but their defeat reacted and in their own side of the border came mutterings of revolt and general dissatisfaction sufficient to lead President Borrillas to talk of resign-

The routing of the Gustemalans, who numbered about 9,000, is described as most complete. They were driven preipitately back over the border and the San Salvador forces captured numerous pieces of artitlery, stands of small arms and great quantities of ammunition.

The disturbance precipitated by the Guatemalan invasion of San Salvador is likely to lead to a general war among the Central American Governments unless, as it is hinted may be the case, Mexico puts in a big warning voice to which the Guatemalans will be obliged to listen.

Guatema'a's interference with San Salvador's politics is the present cause of trouble, but the prime idea on the part of the interfering and invading nation was that of annexing her smaller neighbor to her own territory. This fact puts Costa Rica and Nicaragua on the anxious seat, as they would be at the mercy of such a conqueror, and they are reported undoubtedly to become allies of San Salvador.

Meanwhile it is announced that Honduras will take up the cause of Gautemala and that little San Salvador will thus have its enemies almost on thre sides of it.

Of the chief disputing nations, Guate mala has 46,800 square miles and a population of about 1, 350, 000, while San Salvador has but 7,225 square miles and 651,130
